

## **Grayhorse Technologies, Inc. - Staffing Experience**

**We have been operational since 1984. We specialize in Information Technology Solutions and Technical and Professional Staffing. We have a combined 100 years of IT experience, 35 years of Project Management experience and 35 years of Staffing experience.**

While some companies specialize in IT Solutions and some companies specialize in Staffing, We specialize in both and have since 1984.

We place people at client sites via Contract, Contract Hire and Outsourcing Contracts. We currently have people on site at the same client since 2001. We recruit nationally and have recruited overseas in the past. We have also placed people overseas in Australia and Singapore. We have successfully recruited and managed as many as 250 contractors and consultants at one time spread over twenty states. We have managed 100 person projects. We have also sent contractors to India, China, France, South Africa, Mexico and Australia in the last two years to implement software for our US Based Clients.

We are Charter Members of the Oklahoma Association of Placement Counselors and network with other firms nationwide.
